

## Tocopheryl Acetate screen

Advisory analysis of concentrates for Tocopheryl Acetate using modified Royal Society of Chemistry Accepted Manuscript method *Lu et al.*

The following samples have been screened for the presence of tocopheryl acetate using the method described above. The results of each sample screening are below:

**Client: Orchid Essentials**

**Date Received: 9/18/2019**

Sample Number	Name	Presence detected?
1909CH0572.1999	Dutch Treat	Negative
1909CH0572.2000	Lemon Kush	Negative
1909CH0572.2001	Tropical Trainwreck	Negative
1909CH0572.2002	Bubba Afghan	Negative
1909CH0572.2003	Granddaddy Purple	Negative
1909CH0572.2004	Blue Dream	Negative
1909CH0572.2005	Strawberry Cough	Negative
1909CH0572.2006	Apple Cookies	Negative
1909CH0572.2007	Mango SSH	Negative
1909CH0572.2008	Jack Herer	Negative

*ChemHistory provides the above information for advisory purposes only and indicates only tentatively identified compounds (TICs) noted in the NIST unknown analysis library search. Negative presence indicates a recovery of the analyte of interest at a concentration less than the LOQ.*

**Sample: 1909CH0572.1999**

**Name: Dutch Treat**

**Client: Orchid Essentials**

**Date Tested: 9/19/2019**

**Tocopheryl Acetate detected:**

**Negative**
